

The Production & Quantitative Methods Area at the [Indian Institute of Management Ahmedabad](https://www.iima.ac.in/) aims to recruit multiple faculty members beginning in the 2019-2020 academic year. We are conducting a search with potential to hire from the following broad areas: Operations Management, Operations Research, Statistics. Specifically, we are looking for applicants with research interests in the following areas.

Operations Management: Supply chain management

Operations Research: Stochastic optimization; Nonlinear optimization; Markov decision process; Optimal control theory

Statistics: Statistical methods for machine learning; Spatio-temporal modeling for large data; Applied time series analysis

Applicants should hold a PhD in Operations Management, Operations Research, Statistics, or a related discipline, and be able to teach basic courses in operations management, operations research, statistics, business analytics to business audiences.

IIMA is a top-ranked business school with MBA, Exec MBA, PhD, and Executive Education programs. Our goal is to develop value-driven business leaders, entrepreneurs, with a global mindset who will contribute to the society at large. We have a strong international focus with alliances/partnerships with premier management institutes around the world.

IIMA encourages and generously incentivizes publication in the top scholarly journals in both management and other basic disciplines of management. Internal funding for research and conference attendance is generous. The Production & Quantitative Methods Area comprises faculty members with varied research interests. To learn more, visit:
